

PATENT APPLICATION

042390.P3294CR

Objection under 37 CFR §1.173**Amendment to Specification**

The Office Action stated that the reply filed 6-25-01 was not responsive in part because this amendment to the specification and claims does not comply with 37 C.F. R. §1.173. Unfortunately, the Office Action did not provide any further particular details. Nonetheless, Applicant is attempting to do everything we can to comply with the Examiner's request. 37 C.F.R. §1.173 outlines the requirements of a reissue application. Accordingly, Applicant is filing herewith the following documents in an attempt to comply with the requirements of 37 C.F.R. §1.173:

- 1) A copy of the original specification from the issued patent in double column format printed on a single side.
- 2) A clean copy of the drawing sheets from the original patent.

Applicant believes this addresses the Examiner's concerns. If it does not, Applicant respectfully requests clarification as to what additional information is needed.

Response to Paragraph 3 of the Office Action

The Office Action stated the abstract of the disclosure does not commence on a separate sheet in accordance with 37 C.F.R. 1.52(b)(1). Accordingly, Applicant is filing herewith a copy of the Abstract from the original patent on a separate sheet of paper.
